DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-85 are drawn to a method for generating an interaction profile, classified in class 725, subclass 46.
 - II. Claims 86-106 are drawn to a method for identifying which subscriber is interacting with the television, classified in class 725, subclass 9.
 - III. Claims 107-126 are drawn to a method for determining traits associated with an entity interacting with the television, classified in class 725, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such as generating an interaction profile to determine the viewing habits and preferences of the viewer which is not required for the identifying the individual user in invention II and determining traits associated with an entity in invention III.

Art Unit: 2611

In the instant case, invention II has separate utility such as identifying which subscriber is interacting with the television to facilitate delivery of targeted content which is not required for determining traits associated with an entity in invention III.

In the instant case, invention III has separate utility such as creating a profile of the particular user.

See MPEP § 806.05(d).

3. A telephone call was made to Attorney Andrew Spicer on 1/9/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
